

Aston Martin DB2 Coupe (1952)

Recently purchased from America, this 1952 DB2 has finally docked and arrived at Post Vintage.

This restoration project will see LML/50/80 be fully restored as a period racing car.

Originally finished in the Aston Martin colour of Crushed Strawberry with Grey trim, LML/50/80 has a good history file, which contains the factory build sheet complete with colour samples.

Please keep visiting these restoration pages to see how the car progresses.
