

DB2 NLV 242

These 2 DB2's were found in a barn, having been there for many years. This blue car is now the fully modified race car below. Ian Kendall had seen the cars in the barn and kindly provided the photos when he knew we had bought the cars.

It has been mainly John Reed who has built this car over the last 3 years, with help from sons David and Tony. 2007 is the first year this car has been out on the race track.

Photos - Anne Reed
