Details

This rare DB MKIII DHC has been stripped down in readiness for full restoration. The car is now loosely assembled in order to be offered for sale due to a change of plans.

The car is said to be missing the cylinder head assembly, and two of the pistons are said to have sustained damage. The interior is complete, as is the hood and hood frame. The total recorded mileage is quoted as 92,265 and the car was originally registered FPL 10 when new in 1968. The car

has been in the same ownership since 1986.

We are advised, by the vendor, that the cylinder head suffered damage and was sent for repair. The engineering company that was carrying out the work appear to have mislaid the head. The car still has the inlet and exhaust manifolds, carbs and other ancillaries.

Note: This description is provided by the vendor and unless otherwise stated is 'Not Verified' by Barons or any person employed by Barons. Prospective purchasers are advised to satisfy themselves as to the accuracy of any statements made, whether they be statements of fact or opinion.

Estimate £55,000-75,000
