## ASTON MARTIN INTERNATIONAL - 1930

4 cylinder - 1495 cc  
 chassis and engine # JO/79  
 reg.nr. KR 8731

This unique Aston Martin International has a very attractive 2/3 seater fabric body by James Young of Bromley. The car is totally original and was never restored and always maintained and is in excellent condition! It woke up from a very long sleep recently, and is running and driving very well. New brake linings have been installed and some electrical work has been done recently. The original logbook is with the car and full history is known.

This automobile is a real time warp, and is your last chance of owning an untouched Aston Martin International! Therefore, the car is very expensive and is priced higher than any other pre-war Aston Martin on the market today. If you are seriously interested in acquiring this car, please call for an appointment.

CarDiscoveries has the honor to offer this car for sale on behalf of its owner.
